DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-12, 15 and 25, drawn to anode monitoring, classified in class 204, subclass 400.
 - II. Claims 13 and 14, drawn to data transmission on a metallic structure, classified in class 702, subclass 38.
 - III. Claims 16-24, drawn to sub-sea pipeline power transmission, classified in class 324, subclass 365.
2. The inventions are distinct, each from the other because of the following reasons:
3. Inventions (I) anode monitoring, (II) data transmission on a metallic structure and (III) sub-sea pipeline power transmission are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case Group I is drawn to a system for monitoring the integrity of anodes, which can be used for indicating corrosion on metal surfaces, Group II is drawn to a system for transmitting data over a metallic structure, which could be used for transmitting information between a control station and a substation, and Group III is drawn to system for transmitting power over a sub-sea pipeline which is used for applying a voltage to power a load on the pipeline.

4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

5. A telephone call was made to Attorney of record, Ernest F. Chapman on May 14, 2003 to request an oral election to the above restriction requirement, but did not result in an election being made.

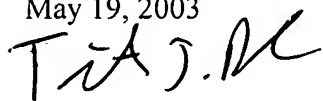

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Timothy J. Dole whose telephone number is 703-305-7396. The examiner can normally be reached on Mon. thru Fri. from 8:00 to 4:30.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, N. Le can be reached on 703-308-0750. The fax phone numbers for the organization where this application or proceeding is assigned are 703-872-9318 for regular communications and 703-872-9319 for After Final communications.
